

Housing, Hosting and International Networks Capabilities

Autonomous Public System: AS8554

- RIPE Local Internet Registry
- Autonomous routing and traffic management
- Unlimited IP addresses allocation

5 Points of Presence in France et Italy
Redundant fiber channel backbone n* 1 Gbps
Main Datacenter in Sophia Antipolis
Low latency Internet access:
 Sophia - Paris : 16 msec RTT | Sophia – Milan : 8 msec RTT

3 Points of Peering
 Sfinx, FranceIX, Equinix

IP Transit with International Network Operators

- Century Link - Level3
- Cogent
- Opentransit-Orange
- GTT - Interoute

Performances and SLAs

- Lan-to-Lan, MPLS, Transit IP v4 et v6, ...
- Security: VPN, Firewall, IPS, redundant DDoS protection, SOC & SIEM
- Availability: 99,99%
- Recovery time : 4 hours
- Traffic latency: intra-Europe 50ms, USA&Canada 80ms
- Packets delivery: 99,9%

Redundancy – Service Continuity
Local Presence – International capabilities
